Sacramento Jet Center (SMF) and (SAC) Selects Air BP as Primary Fuel Supplier

Air BP to Supply Aviation Fuel to Dual Facilities, Sacramento Jet Center's Flagship Executive Facility (SAC) and the State-of-the-Art International Facility (SMF)

Salem, Oregon – March, 2008 – Sacramento Executive Jet Center, a premier Northern California FBO, and Air BP join forces within the aviation industry. Air BP, a world-class fuel supplier, was named by Sac Jet as their primary source for quality fuel services.

Sacramento Jet Center (SMF, SAC) has taken the general aviation industry by storm. The acquisition of the Patterson Aircraft Company in 2001 began the mission of becoming Sacramento's number one, customer-focused FBO. State-of-the-art hangar and office facilities, on-demand maintenance and avionics support and a full range of ground services are just a few amenities that Sacramento Jet Center offers. For additional information, visit the (SMF, SAC) website: www.sacjet.com.

"Our desire is to ensure that both our based tenants and transient customers receive the same value on the ground that they expect in the air," states President of SAC, Scott L. Powell. "We want our customers to know that Sacramento truly provides a "Nice Landing".

Air BP will assist SMF and SAC in a full range of services such as fuel distribution, marketing capabilities and safety training programs. Air BP's primary goal is to collaboratively build dually located Sacramento Jet Center's long standing reputation of providing the General Aviation industry with the, "safe, efficient and accurate delivery of flight support services."

"We are delighted to be affiliated with the people at Sacramento Jet and the type of facilities and service they provide to the aviation community. We are excited about the future of aviation in Sacramento and look forward to helping Sacramento Jet grow their business." explains Steve Highet, Air BP's Manager of General Aviation Sales.

###

Air BP is a leading global marketer of aviation fuels, related products and support services. They provide aviation fuel, lubricants and related services at more than 1,600 locations in 90 countries around the world.
