**Air BP Aviation Services Offers Discounted FlightView Flight Tracking Software to Branded Dealers**

**Strategic Partnership with Leading Provider of Accurate Real-Time Flight Information Saves Air BP FBOs Up To 50%**

**Salem, OR – May, 2006** – Thanks to a new agreement with FlightView, all Air BP dealers can now purchase FlightView Dispatch at a discounted rate. FlightView Dispatch is a PC-based Aircraft Situation Display system that graphically displays real-time information overlaid on a map with moving weather including AIRMETS, SIGMETs, and TFRs.

FlightView Dispatch has many features that are crucial to providing better service. Many companies especially like using the alerts feature – setting up alerts when certain flight scenarios such as special arrivals, departures or diversions occur. As a result, they are better prepared to handle their ground operations seamlessly and their level of customer service demands and visitor frustration are significantly reduced. An added value is that customers also appreciate the large screen displays of FlightView Dispatch installed in FBO lounge areas – a really great customer service tool.

Elliott Aviation, a big FBO headquartered in Moline, IL, uses Dispatch in all four of their airports. It has been successfully implemented in their Charter Operations since 2002 and their FBO Operations since 2004.

“FlightView’s capability for live tracking has enhanced our customers’ confidence level in our FBO service. It has helped our service staff to be ready and well-positioned when the planes land. FlightView simplifies everything for us. It is nice to know that we have something that we can rely on for accurate, real-time information,” says Charlie Stockton, Flight Department Manager of Elliott Aviation in Des Moines, Iowa. He adds, “FlightView time is perfect! When it says the plane is landing at 12:01 p.m., you can be sure that at 12:04 p.m. it is taxiing down the runway. It is amazing to us when we get real-time information that is reliable.”

FlightView data also provides an invaluable marketing resource, giving you a snapshot of travel trends for your airport or neighboring facilities. Many companies use Dispatch as a decision-making tool in business development.

Nancy Thomsen, Air BP Business Aviation Manager states; “We feel that FlightView’s accurate real-time flight situational information is important to any airport and FBO operation. This partnership demonstrates Air BP’s commitment to our FBO network and our ability as an aviation company to provide programs beyond quality fuel.”
