Millville Jet Center (MIV) Selects Air BP as Key Fuel Supplier

20+ Year Aviation Maintenance Veteran and All-Inclusive FBO Continues Expansion Repair Services

Salem, Oregon – March, 2008 – New Jersey’s Millville Jet Center (MIV), one of the fastest growing FAA part 145 repair stations in the USGA, has contracted Air BP to fulfill their fuel supply. Air BP and MIV’s common goal to supply products and services in an efficient manner will grow both the aviation industry and both individual businesses in tandem.

Millville Jet Center offers twenty years of experience in corporate aircraft maintenance. Expert technicians in the fields of maintenance, aircraft structure, avionics, composites and non-destructive testing paired with skilled FBO line men ensures a “one-stop-shop” experience.

“We are excited about our alliance with Air BP and look forward to our mutual partnership,” states Alexandra Spencer, Millville Jet’s Marketing Manager.

Millville Jet Center continues to excel in the “hot fueling” option for emergency services. Refueling emergency helicopters while the rotors are still running cuts the refueling process by over 15 minutes. This nonstop refueling process allows emergency aircraft to return to flight safely and efficiently.

Along with fuel distribution capabilities, Air BP offers marketing and promotional support, branding resources and general business growth opportunities to Millville Jet Center.

“We are proud to be a partner with Millville Jet Center,” states Dan Gallogly, Air BP’s General Sales Manager, East USA. “The Millville organization continues to offer first rate innovative services that are recognized to a large audience of aviation professionals.”

###

Air BP is a leading global marketer of aviation fuels, related products and support services. They provide aviation fuel, lubricants and related services at more than 1,600 locations in 90 countries around the world.
